The following is an examiner's statement of reasons for allowance:

The closest prior art of record, the combination of Ogura US Patent 6,211,041 and Sakaguchi et al. US Patent 6,313,014, fails to show, "flashing said support substrate with radiation energy which is directional and impinges on the second surface of said support substrate for a substantially instantaneous time to go through said support substrate toward the first surface and heat the first depth of said silicon substrate to an annealing temperature", (claims 1-8) and fails to show, "flashing, directionally an opposing second surface of said second substrate to heat said first depth to an annealing temperature." (claims 9-15).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
